# Biomass Pellet Mills

THE WORLD'S MOST POPULAR MACHINE

## PELLET MILL

- Lowest operating costs
- Easy to operate
- Strong, robust design
- Lowest maintenance costs
- Extra low energy consumption
- Compact and space-saving
- Most consistent quality of production

As the world's largest manufacturer of pellet mills, CPM has led the way in developing specialized pellet mills and dies to produce wood pellets both efficiently and economically.

The pellet mills are built to operate 24 hours a day under tough running conditions to match the output requirements. 30 years of experience and more than 600 biomass pellet mills in operation around the globe have proved the one piece gearbox to be the most robust, reliable and compact transmission principle. With the lowest operating costs.

No-nonsense design combined with the latest technology, such as the Oil Lubricated Rollers. This system increase life-time of roller bearings and lower your operational cost even further.
